

Question

What question are you trying to answer?

Hypothesis?

What is the purpose?

How does this contribute to the field of study?

Design

Procedures

What was your plan for collecting data?

Methodology

Variables/Controls explained, which is independent and which is dependent?

What techniques/processes did you use and why?
(think about your background research and knowledge)

Data Collection

Charts/Graphs

Any data models/Photos/Drawings

Analysis

My collected data means:

The results show:

Conclusion

‘So What?’ – Why is your project unique and what does it add to the world

What applications are there for your project?

Please include at least two references you used for your project here.
